

SDP-related issues

- Avoid fmtp media type description for HTTP – what if URL has different type?

Content transmission

- same service – just one phone number (in SIP), not two!
 ▮▮▮▮▮ multipart really needed?
- overlap with fax-by-email, etc.?
- use content-id as used for email messages
- alternative proposal (without SDP):

```
INVITE faxback@mailorder.com SIP/2.0  
To: John Jones <tel:2125551212>  
Call-Disposition: fax  
Content-Type: text/uri
```

```
http://localstore/IroningBoards/2344.html
```

Content delivery, cont'd.

INVITE pager@mailorder.com SIP/2.0

To: John Jones <tel:8889934690>

Call-Disposition: pager

Content-Type: text/plain

This is the text that will appear on the pager.
