

Questions ?!?

Available software from ISI

- RAToolSet
- RIPE database with RPSL extensions
 - compatible with RIPE db 2.1.3
 - RPSL is fully supported
 - will move to beta soon
- RIPE181 to RPSL database objects converter
- web site: <<http://www.isi.edu/ra/rps/transition/>>

Education effort

- first tutorial was at june NANOG in Detroit
- next one at september RIPE meeting in Edinburgh
- more will follow ...

Phase 2: real-time mirrors, tool testing

- RIPE, ANS & Merit (RADB) are in phase II
 - MCI & CANET are testing ISI RPSL server software
 - Telstra moved to RPSL and is waiting for the others...
 - Connect in AU is configuring their routers using the alpha release of RAToolSet
 - other providers are evaluating the tools and want to join after the IRR moves to RPSL

Transition phases

- phase 1:
 - (server) software development, testing

- phase 2:
 - tool development, testing, education
 - real-time mirrors of IRR in RPSL format
 - special RPSL update path for 'aut-num' objects

- phase 3:
 - switch over
 - incoming RIPE181 objects are automatically converted to RPSL

RPSL Transition
