

RPS ICANN Issues

Cengiz Alaettinoglu
Curtis Villamizar
Ramesh Govindan

ICANN Authentication

- Public key is distributed with software

Root of authorization

- Inetnum: 0.0.0.0 – 255.255.255.255
- as-block: as0 – as65535
- . . .
- Assignments to regional registries
- ICANN needs to sign and register these
 - can run a registry
 - can register it elsewhere

Creation of other registries

- Repository object
- repository key certificate
- repository maintainer
- these too needs to be signed by ICANN
