# *iSCSI – a SCSI over TCP mapping*
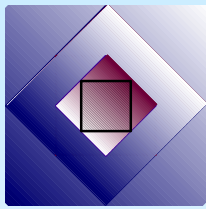

IETF53 Minneapolis –March 2002

Julian Satran - IBM

IBM Research Lab in Haifa

Status

- All major issues closed
- Editorials/Clarifications/Minor changes
  - Naming mandatory part – where (main or separate)
  - An optional key for TPGT (a target response)
  - BIG – bit ordering change on all figures – careful rereading of text needed
  - Do we need 2 MaxBurstSizes?
  - Do we need to enforce "data-fulfillment" on R2T?
- Ready for last call
