

Registration Revocation in Mobile IP

(draft-ietf-mobileip-reg-revok-02.txt)

- Issue: Should the draft be removed from the working group?

- **The Factors:**

Depends entirely on WG interest.

- There were private discussions,
- There was little discussion on the list.

- **The Key:**

Does that imply little interest - or -

little [remaining] technical objection to the draft?

- **Aside ->**

Fact: 3GPP2 has discussed using this as their revocation mechanism of choice.

Fact: That shouldn't effect us any more than we care to let it.

- So... do we care to define this mechanism here?
- Feedback (this means YOU - or can't we decide this here?)
