

IETF RDDP WG Draft Status - July 2003, Vienna IETF meetings

-- Problem Statement and Architecture

draft-ietf-rddp-problem-statement-02.txt
draft-ietf-rddp-arch-02.txt

To become Informational RFCs.

Finished WG Last Call. Shared buffer pool issue outstanding against architecture draft - on agenda for this meeting. Drafts will go to ADs once this issue is acceptably resolved.

-- Main Protocols

DDP (draft-ietf-rddp-ddp-00.txt)
RDMAP (draft-ietf-rddp-rdmap-00.txt)

To become Proposed Standard RFCs.

No technical issues meriting use of meeting time, but drafts probably have not received extensive technical attention due to WG focus on TCP mapping issues. PLEASE REVIEW THESE DRAFTS!!

-- Applicability Statement

draft-ietf-rddp-applicability-00.txt

To become an Informational RFC.

On agenda for this meeting.

-- SCTP Mapping

draft-stewart-rddp-sctp-02.txt

To become a Proposed Standard RFC.

WG Chair to remind authors to submit next version as draft-ietf-rddp-sctp-00.txt, since this is an official RDDP WG draft. On agenda for this meeting.

-- TCP Mapping

To become a Proposed Standard RFC.

No official WG drafts, draft-culley-iwarp-mpa-03.txt on agenda with likely request to become an official WG draft. Since last meeting, most of the major technical issues surrounding this mapping have been resolved on the mailing list - WG chair will review these in second meeting session.

-- Security

draft-pinkerton-rddp-security-00.txt

New draft. Whether it will be Informational vs. Proposed Standard is TBD. On agenda, with request to become an official RDDP WG draft.

-- Concerns

draft-ietf-rddp-rdma-concerns-00.txt

Will not be published as an RFC. Draft is information for consideration by the WG.
