

GKMARCH Updates

- Version 0.6 posted on September. Main changes:
 - Complete review of text
 - Updated discussion on reliability of rekey messages.
 - What to do when SA gets out of synch?
 - Re-register
 - Get rekey info using unprotected unicast from controller
- Went on last call. Main last call remarks:
 - Gross: Allow getting rekey info from peers
 - Weis: (editorial) Add a “goals” sub-section to registration section
- Will incorporate and submit to IESG review.
