

H.263 & H.261 payload format

draft-ietf-avt-rfc2429-bis-00

draft-ietf-avt-rfc2032-bis-00

Roni Even

Roni.even@polycom.co.il

Introduction

- These are revisions of the H.261 and H.263 payload formats with the intention to publish them as draft standards
- Added new SDP parameters based on draft-even-avt-h263-h261-options-00
- Edit the drafts to comply with new RFC editor guidelines

Issues

- No issues for RFC 2032-bis
- In RFC 2429-bis how to use the new parameters with the profile/level parameters. The suggestion is not to use them together.
- In RFC 2429 do we need only the defined parameters

Next step:

- Add offer/answer examples for both drafts
- List of editors for RFC2429 will be updated based on input from Stephan Wenger.
- Solicit response for RFC 2429 bis parameters
- Try to make the 01 revision ready for WGLC
