Enke Chen

10 min

10 <draft-farrel-mpls-preemption-00.txt>

Adrian Farrel

10 min

Reminder

The agenda slots are not allocated for presentation of the drafts, but rather discussing the problem that the draft tries to solve. For individual -00 drafts a short overview is advisable.

For individual -00 drafts (or if it is the first time a higher numbered individual draft is discussed in a meeting) we are asking for the meeting's opinion whether this is work that the working group should take on. And if so is it the solution in the draft that should be the basis for a working group document.

For working group documents we are asking whether this document is ready for working group last call or for being handed over to the IESG for review.
