Education (EDU) Team Update

Margaret Wasserman

General Area Meeting

IETF60, San Diego

August 2004
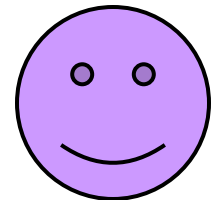

What is the EDU Team?

* Functional team, chartered by the IESG

  - Charter: http://edu.ietf.org/archives/000103.html

* Manages the internal education efforts of the IETF, primarily focused on role and process education for IETF participants and leaders.

* Contact us:

  - Team mailing list: edu-team@ietf.org

  - Open discussion: edu-discuss@ietf.org

    - To subscribe: https://www1.ietf.org/mailman/listinfo/edu-team

  - Web: http://edu.ietf.org/

EDU Team Update

* EDU Team training sessions at IETF60:
  - Newcomers Training
  - Editor's Training
  - WG Chairs Training
  - Security Tutorial
  - Topical session for WG chairs
* Continuing "smiley face" experiment
* Charter renewed/updated in July 2004

Updated EDU Team Charter (1)

* Maintain and enhance our current training programs
  - Newcomer's training
    - Including local-language sessions, as appropriate
  - Introductory WG Chairs training
  - Ongoing WG Chairs training (topical)
  - Editors training
  - Security tutorial
  - Participant training sessions (topical, as needed)
* Includes scheduling, logistical planning,deciding what will be presented by whom in topical sessions, and managing the development of training materials.

Updated EDU Team Charter (2)

* Future Plans (July 2004-July 2005):

  - Making the material covered in our existing training sessions available via the web.

    - Making our web site more available through IETF web site

    - Producing web-accessible educational materials.

    - Submit updates to education-related portions of the IETF web site.

I E T F

Updated EDU Team Charter (3)

* Future Plans (continued):
  - Launch two new training topics this year (training sessions and web materials
    - Bringing New Work to the IETF
      - How to bring documents to WGs & form new WGs
      - Intended to encourage participants to bring new work to the IETF
      - Also covers IPR and control implications of bringing work into the IETF
    - IETF Protocol Engineering Fundamentals
      - Technical topic for all IETF participants
      - Explore technical considerations all authors and reviewers should consider
      - Focus on cross-area issues, such as congestion control and internationalization

Updated EDU Team Charter (4)

* Future Plans (continued):

  - Work with the Internet Society (ISOC) Standards Publications and Resources committee to develop a proposal for a periodic joint publication that will summarize and explain the major activities of the IETF.

  - This proposal will be publicly presented and submitted for IESG review and approval.

Supporting IETF Process Changes

* EDU Team will look for ways to support IETF process changes as they emerge
  - Training for ICAR reviewers
  - Training for IETF participants on NEWTRK standards process changes
  - Etc.
