What do we want to do with NAT-PT?

What to do with NAT-PT (applicability statement)?

- ☐ The document came out around 2 IETFs ago
- ☐ Was like "usage cases for NAT-PT"
- ☐ WG consensus that it needed to be more "negative"
  - ○ Like, "NAT-PT has problems. Don't do it. But if you're really, really sure.."
- ☐ Do we want to continue the work, change emphasis?
  - ○ If so, any volunteers -- contact the chairs?
