

HIP architecture document

Pekka Nikander
HIP WG, Monday, Nov 7th, 1pm
61st IETF

Presentation outline

- Document background and history
- Last call comments
- Next steps

Background and history

- Descendant of the original HIP architecture document by Bob Moskowitz
- Needed as a *stable reference point*
- Aims to document the architectural thinking *as of fall 2003* (i.e. a year ago)
- Last call running until Nov 15th (next Monday)
- Planned to be submitted to the IESG once the LC comments have been resolved

Last call comments (so far)

- Lars Eggert:
 - Editorial (some to be applied, some ignored)
 - Clarifications (to be handled)
 - One more substantial:
 - What is the right term for ephemeral HIs:
 - anonymous?
 - private?
 - unpublished?

Next steps

- Wait for additional comments
 - Please read the draft!
- Fix issues (if any)
- Submit to the IESG before the end of the year
