Updates to Java and C# Bindings

Two Drafts

- draft-ietf-kitten-gssapi-rfc2853-update-for-csharp-00
- draft-ietf-kitten-rfc2853bis-00

Java & C# Bindings

- Describes modifications necessary to allow Java Bindings to be re-used for C#

- Requires merging into 2853

2853 bis

- This document corrects or updates two sections of the original, section 6.3.2 for GSSCredential usage flags, and section 6.8.1 for GSS status code values.

- The original Java bindings of the GSS-API left out the specification of the values of the credential usage constants.

- Additionally a transcription error resulted in misalignment of the major GSS status codes in sections 6.8.1 and 4.12.1.
