RADIUS Mobile IPv4 extensions V.02

Madjid Nakhjiri,

Kuntal Chowdhury,

Avi Lior

Kent Leung

Changes from V1

- Precise description of how to use NAI/ IP address

- Precise description of MA processing of RRQ

- Clean up of attribute section
  - New versus existing attributes
  - Attribute table added
  - Please review/ RADEXT needs to review

- Diameter-RADIUS message translation
  - Details on how to deal with RADIUS attribute size limitation
    - MIP-HASH-RRQ
  - NEW attribute or new NAS-Port-Type? For distinction of FA from HA (for Diameter RADIUS translation)
    - MIP-MA-TYPE

Remaining work/ Needed

- More details on Diameter AVP-RADIUS Attribute translations

- MIPv4, please (RFC3012bis fix?)
  - Issue with MN-AAA authenticator and MFCE

- RADEXT, Please
  - RADEXT please review attributes

- Next rev as a WG draft?
