Eddie Kohler

DCCP

July 2007

The Dropped Packets Option

- Reporting the number of lost and marked packets per loss interval, for CCID 3.

- This would be used in CCID 4, TFRC-SP (Small Packets), a variant of CCID 3.
  - For short loss intervals.

Next steps:

- This is fairly straightforward.
- Approved as a WG item?
- Read and reviewed by a small number of people?
