RMD-QOSM - The Resource Management in Diffserv QoS model

draft-ietf-nsis-rmd-12

Attila Báder, Lars Westberg, Georgios Karagiannis,
Cornelia Kappler, Tom Phelan, Hannes Tschofenig

Main updates since IETF-69

- Two main updates based on comments from Hannes:

    - <Max Admitted Hops> parameter used during partial release is added into the *PHR Container*

    - Example on retransmissions is added in a new appendix subsection

    - Editorials
