

draft-ietf-behave-dccp-01

BEHAVE working group meeting

Rémi Denis-Courmont

VideoLAN project, VLC

IETF72 - July 29th 2008

Changes since draft-denis-behave-dccp-00

- removed hints at UDP tunneling
- restructure like BEHAVE-TCP
- fleshed out REquirements for NATs

Changes since draft-denis-behave-dccp-01

- DCCP-Listen (simultaneous open) support
- checksum and service code
- editorial fixes
- BEHAVE working group item

Current proposal

- like the BEHAVE TCP document, with one exception:
- "MUST NOT" implement ALG
- DCCP specifics:
- Listen packet, checksum coverage, service code

What's next?

- Last call across BEHAVE and DCCP?
