

BLISS ACH HTTP API

draft-zourzouvillys-bliss-ach-http-api-01

XCAP Lite? (!!)

- the protocol to be a general protocol to configure stuff?
- 3gpp application profile already exists
- extensibility

Feature Creep

- reading all settings at once
 - single document for all settings rather than one?
- time of day routing

Overlap with ACH

- define SIP status codes to feature mapping?
- 3xx handling

Way forward

- Adopt?
