

# **draft-ietf-kitten-gssapi-naming- exts-04**

Leif Johansson

## Major issues

- Mapped
- Negative
- OIDs vs Strings

# Mapped

- Remove entirely

## Negative

- Change semantics from negative to complete in accordance with Nicos suggestion. Make it clear that complete only work in corner cases.

## OIDs vs String

- Change the usage from OID to `const char *` with normative text explaining what those strings SHOULD be (OID, UR\*, etc) and how to distinguish them.
