

vCard social network info

draft-george-vcarddav-vcard-extension

Barry Leiba & Robins George
Huawei Technologies

What?

- Define vCard properties to represent social network information
- Build on FOAF
<http://xmlns.com/foaf/spec/>
- Draft is very preliminary

Items there today

- OpenID -- maybe change to
Authenticate?type=OpenID
- SocialProfile -- URI for user's profile
- PhotoAlbum -- change to
Album?type=photo
- Depiction, SocialCode, Interest
- Other...

Where to go?

- Collaborate with FOAF (Dan Brickley)
- Clean up what's there
- Fill out with other properties
- Issue: no hierarchy, so it's harder to tie properties to specific social networks
