

draft-thomson-geopriv-res-gw-lis-discovery

Ray Bellis

Nominet UK

GeoPriv @ IETF78

Draft Status

- -02 about to expire (30th July)
- -03 will be published very shortly
 - Updated references
 - No significant changes
- New issue needs resolving
 - SSL server name rules from LIS Discovery I-D wouldn't work in "in-addr.arpa"

WG Adoption?

- There is an existing milestone for this item
- There's running code
 - at least two known implementations
- We need group input and issue tracking to resolve the issues raised at IETF77
 - DNS tree climbing – any better method?
 - Privacy concerns
