Public Safety Answering Point (PSAP) Callbacks

draft-ietf-ecrit-psap-callback-02.txt

H. Schulzrinne, H. Tschofenig, M. Patel

Status

- At IETF#79 I suggested a solution based on previous discussions.
- Basic idea:
  - Marking in SIP messages (as
  - Usage of existing SIP identity-based security mechanisms
  - Richard suggested to learn PSAP identities using LoST (to simplify maintenance of white lists).
- Alternative suggestion raised during meeting (based on tokens).
  - Lightweight approach
  - See my mail: http://www.ietf.org/mail-archive/web/ecrit/current/msg07357.html
- Problem: Token based approach does not fulfill IMS call routing use cases.

Next Steps?

- Options:
  1) Define both solutions
  2) Pick one (and leave the other group unhappy)
