Ghostbusters

- More precise text (thanks SK)
- Now uses draft-ietf-sidr-signed-object
- Added "N:" as it is required by VCard spec
- Require BEGIN, VERSION, FN, N, & END
- One or more of ADR, TEL, and EMAIL MUST be included
- Other types MAY NOT be included.
- OID assigned

Origin Ops

- Stronger SHOULD/MUST text
- Ensure sub-allocs registered before registering covering ROA
- Accepting Invalid downgraded to MAY
- Be careful that community signaling MAY NOT upgrade an Invalid

RPKI->Rtr

- Glossary up front

- Color became Zero became Cache Nonce

- IANA Considerations formalized

- More Error Codes (thanks implementers)
