

RADIUS extensions for DS-Lite

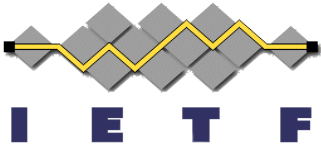

draft-ietf-softwire-dslite-radius-ext-02

R. Maglione – Telecom Italia
A. Durand – Juniper Networks

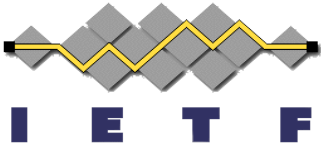

Background

- This document specifies a new RADIUS attribute to carry the DS-Lite Tunnel Name

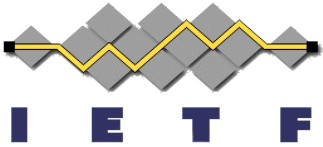

Main Changes

- *Version -00* contained two RADIUS attributes:
 - DS-Lite Tunnel Address
 - DS-Lite Tunnel Name
- In *version -01* the DS-Lite Tunnel Address attribute was removed in order to align this document with latest version of *draft-ietf-softwire-ds-lite-tunnel-option*
- *Version -02* contains just minor editorial changes

Next Steps

- On March 04 2011 the chairs started a 2-week working group last call on this draft
- No comment was received
- Does the working group believe this draft is ready for the IESG?

Questions?

Thanks!
