

Update on REPORT MIB draft

Robert Cole
Joe Macker
Al Morton

Update on draft-ietf-manet-report-mib-01

- Way too complicated as it stands (IMO)
- Currently provides three report types:
 - Statistics – moments, min/max etc over a defined reporting period
 - Samples – periodically sampled values over a defined reporting period
 - History – event changes (value and time) of object over defined reporting time
- Want to simplify by choosing one report type (and evaluate interest in developing other capabilities later)
- Recommend Option 2 - periodically sampled data

Next Steps for draft-ietf-manet-report-mib

- Reduce reporting options to one
- Quickly rev draft to reflect this
- Move to 'Last Call' soon after
