

The Future of DANE?

Post dane-protocol work

Operational Draft?

- Protocol doc has a operational section
- Do we need one?
 - If yes, any volunteers?

What else?

- IPsec (it's in the charter)
- S/MIME (non-WG I-D Exists)
- Bare keys (OOB Pubkey in TLS)
- Update DANE from TLS WG?

Go into hiatus?

AOB?
