# SDP directorate

- The ADs have approved the creation of the SDP directorate.
- The goal is to provide support to documents that extend SDP and are created outside the MMUSIC WG.
- We are fine tuning the process and list of initial volunteers.
  - Expect some further information in the list
- If you are aware of a document extending SDP, please contact the chairs.

# Alternatives to ICE?

- Interoperability benefits from a single standard
  - If we create another standard, we need to understand which problem(s) it is solving and when it can be applied.
- ICE is the IETF standard mechanism for solving two problems:
  - NAT traversal
  - IPv4/IPv6 transition
- Alternative mechanisms to ICE keep showing up in drafts and discussions.
  - They are simpler and more limited in scope.
- As a group, we need to discuss and understand if there is a new set of requirements.
  - Do we need an ICE alternative for NAT traversal?
  - Do we need an ICE alternative for IPv4/IPv6 transition?
