Last Call Comments

- **Issue 1: Modify document to make it non-MIP based specific**

  ▸ **Trivial changes.**

  Diffs can be seen at:

  http://www.tml.hut.fi/~pnr/MIPSHOP/draft-nikander-n

  LMM document with non-MIP specific language:

  http://www.tml.hut.fi/~pnr/MIPSHOP/draft-nikander-mips

Last Call Comments

- **Issue 2: Clarify in Intro the "binding" intent of document.**
  - ▸ **Proposed text in Intro**

    "This document is meant to capture the thinking and analysis of LMM that began in Spring 2001 and is not meant to bind any future efforts that, due to gained wisdom, may wish to depart from it."
    "This document provides analysis of the HMIPv6 [7] protocol which is summarized in appendix A."

Last Call Comments

- **Issue 3: "Requirements" vs. "Goals" in document title.**
  - ▸ **Proposed titles**

  "Localized Mobility Management Requirements"
  "Localized Mobility Management Goals"

Last Call Comments

- **Issue 4: Reference of FMIPv6.**

  From Seamoby Mobility Related Terminology draft:

  Local Mobility Management: Local Mobility Management (LMM) is a generic term for protocols dealing with IP mobility managem confined within the access network. LMM messages are not routed outside the access network, although a handover may trigger Mobile IP messages to be sent to correspondent nodes and home agents.

Last Call Comments
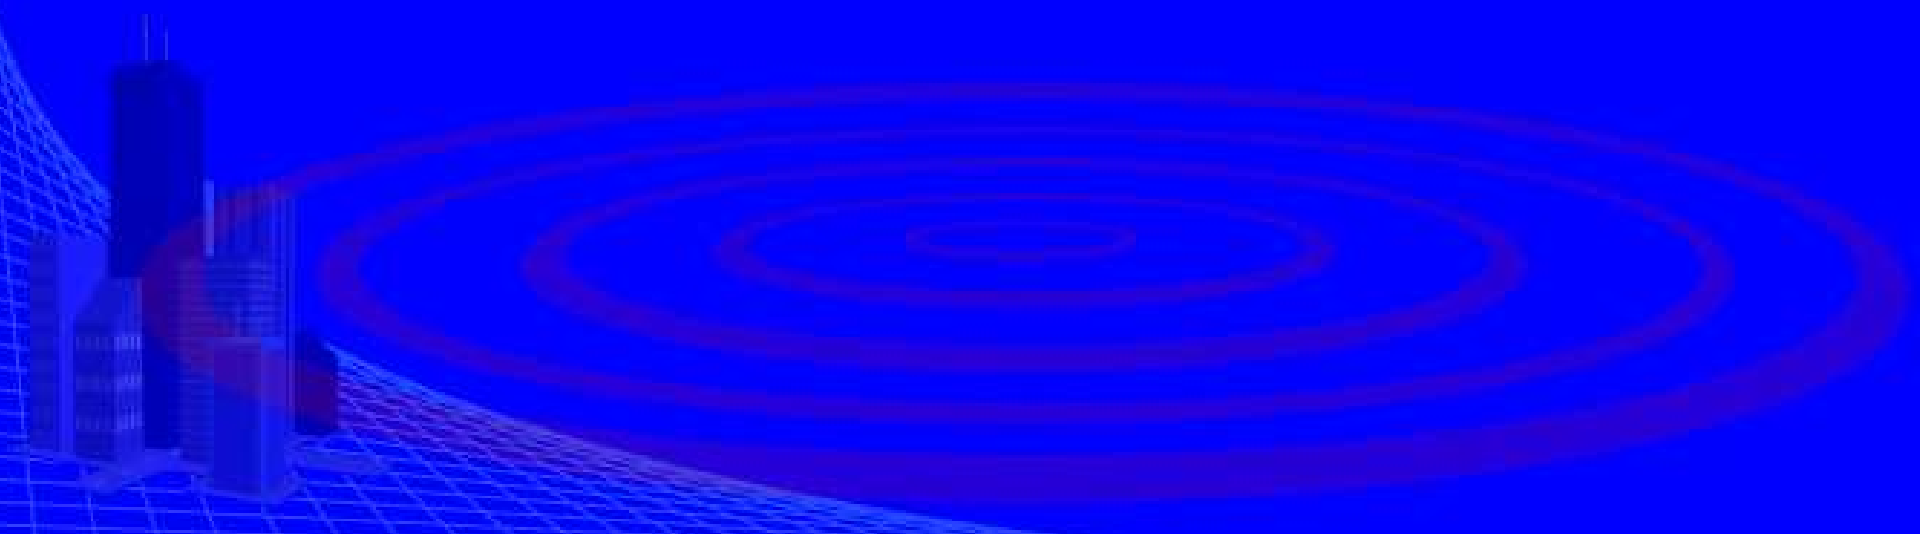

- **Issue 5: Add Security Consideration Section.**

     Pekka and Carl will develop text on Security consideration section and send out to MIPSHOP alias.

Last Call Comments

- **Issue 6: Minor editorial comments.**

  Carl sent these out to MIPSHOP alias and they will be included in final updated draft.
