Anycast-PIM

`<draft-ietf-pim-anycast-rp-00.txt>`

Dino Farinacci, Procket Networks

Yiqun Cai, Cisco Systems

58th IETF - Minneapolis

November 2003

1

Agenda

- Brief Overview

- Draft Chronology

- Status/Going Forward

Intro

- Anycast-PIM is a way to do Anycast-RP without the MSDP protocol

- Has all the benefits of MSDP-based Anycast-RP with less protocols

- See IETF San Francisco presentation for details
  - `http://www.dinof.net/~dinof/anycast-pim/ietf-sf`

Draft Chronology

- Initial draft (-(-1)) completed 12/2002

- After review comments and coding complete, draft (-00) submitted to ID directory 01/2003

- Presented at San Francisco IETF 03/2003

- Authors proposed to advance as working group document

Draft Chronology

- Comments came in about MSDP inter-domain interworking

- Presented status at Vienna IETF 07/2003

  - No draft update at that time

- Updates made 11/2003 and renamed draft:

  - `draft-ietf-pim-anycast-rp-00.txt`

Status/Going Forward

- Please send comments, draft located at:
  - `http://www.dinof.net/~dinof/draft-ietf-pim-anycast-rp-00.txt`

- Should it be integrated into the PIM RFC?

- Should we put this on standards track?

- Informational RFC?

- Should it be a BCP?
