MPOWR Status/Summary

- Sent out charter (included questions)
- Three major charter items:
 - Better document roles of IESG, Chairs, Document Editors, WG participants
 - Produce specific proposals to consider changes to roles (where needed)
 - Consider if changes in current roles are needed (e.g., updates to RFC 2418 or 2026?)

MPOWR Status/Summary (cont.)

- Overall, less feedback than desirable; don't see strong support for forming WG
- Issues:
 - Is there really enough work here for a standalone WG?
 - Not clear just what additional responsibilities need to be moved to WG/chairs
 - e.g., that IESG can't just do (i.e., via PROTO effort)
