draft-leinen-ipfix-tcp-00.txt

Describes IPFIX mapping over TCP

Summary
- ☐ Collector connects to exporter
- ☐ Exporter starts exporting flowsets

Issues
- ☐ Should the exporter initiate the connection?
  - ○ Benoit says yes
- ☐ Should there be a simple handshake? (HELO...)
- ☐ Should we support TLS?

draft-leinen-ipfix-tcp-00.txt

Suggested way forward

- ☐ I revise to align with other transport mappings in protocol draft
- ☐ You read the draft and comment on it
- ☐ We do a few iterations
  - ○ Individual submission or WG draft - does it matter?
- ☐ Then fold into draft-ietf-ipfix-protocol
