

WebDAV

IETF-60

Agenda

- Find scribe
- Agenda Bash
- Review of outstanding drafts
 - RFC2518bis
 - Bindings
 - Redirect
- Non-WG drafts
 - PATCH
 - Quota

RFC2518bis

- Need more active tracking of issues
 - Issue review session
<http://www.webdav.org/wg/rfcdev/issues.htm>
- Last updated to version -06 July 2004
 - Recent changes mostly clarifying lock behavior, decent progress
- Calling a lock a resource
 - No consensus detectable, so no change required

Bindings

- Last updated to version -06 July 2004
- Open issues:
 - Editor's list:
<http://greenbytes.de/tech/webdav/draft-ietf-webdav-bind-issues.html> shows no open issues
 - Issues raised by Lisa about explicitly defining binding interaction with locks, possibly also move

Bindings (2)

- Options proposed by Julian:
 1. Last call as-is
 2. Add more explicit text as requested
 3. Delay until RFC2518bis is completed, then refer to RFC2518bis for interactions
 4. Extract locking out of RFC2518bis, refer to new locking draft for interactions

Redirect

- Last updated to version -08 Apr 2004
- Open issues still exist
- Julian proposes to defer work on redirect until bindings is done
- Discuss: Do we *really* need both?

PATCH

- Ready for Last Call
- Significant review in HTTP WG list
- Discuss: do we want to endorse this as “reviewed by the WebDAV WG”?

Quota

- Ready for Last Call
- Discuss: Should this be a WG document?
