

Care-of address test using a state cookie

draft-dupont-mipv6-cn-ipsec-01.txt

IETF61-MIP6

www.enst-bretagne.fr

Groupe des écoles
des télécommunications

■ Short presentation

- Extracted from IPsec between MN and CN document
- Usable by any routing optimization mechanism without built-in care-of address test/trust
- Initiated by the Correspondent Node
- A state cookie is used in order to avoid easy DoS attacks
- Non-empty IANA considerations section

■ Next steps

- Which routing optimization protection mechanism do need it?
- WG item?
- XML working version of the document available
