Security Best Practices Efforts and Documents  
draft-lonvick-sec-efforts-01.txt

Chris Lonvick <clonvick@cisco.com>  
David Spak <dspak@cisco.com>

# Abstract

- “This document provides a snapshot of the current efforts to define or apply security requirements in various Standards Developing Organizations (SDO).”
- 
- Targeted as an INFORMATIONAL RFC

# Introduction

- “..many SDOs are developing standards with hopes of retaining an acceptable level, or even improving this availability, to its users.
- “Many of these SDOs have diverse charters and goals and will take entirely different directions in their efforts to provide standards. However, even with that, there will be overlaps in their produced works. If there are overlaps then there is a potential for conflicts and confusion.”

# Introduction

- “For these reasons, the authors wish to encourage all SDOs who have an interest in producing, or in consuming standards relating to good security practices to be consistent in their approach and their recommendations.”

# Format of the Document

- Glossaries
- A listing of SDOs that appear to be working on security standards
- A list of documents which have been found to offer good practices or recommendations for securing networks and networking devices

# What needs to be done

- Addition of ITU-T SG4 Q18 Work – expansion of ITU-T Recommendation M.3016 based upon inputs of ITU-T Recommendation X.805 and ANSI T1.276-2003
- Review by interested parties
- 
- Should this remain an Individual Contribution or should this become a WG Document?
