

# The SDP Content Attribute

draft-hautakorpi-mmusic-sdp-media-content-01.txt

Jani.Hautakorpi@ericsson.com

## The Idea

## Changes Since -00

- We've got quite a lot of concrete feedback:
  - Possible overlap with work done in SIMPLE
  - Possible overlap with work done in XCON
  - Possible overlap with SMIL
- Added a Section, titled "Operation with SMIL"

## General Info and Next Steps

- There's quite a lot of interest towards this content label (and one implementation)
- This *content label* is only optional
- More careful analysis on what these 'media tokens' should be is needed
- Does the WG want to adopt this draft as a WG item?

Questions, comments?
