---

# Agenda

## **Preliminaries** (15 min)

- Agenda bashing, blue sheets and notes takers
- Document status

## **Protocol Presentation** Pasi Eronen (15 min)

- <http://www.ietf.org/internet-drafts/draft-ietf-mobike-protocol-01.txt>
- Goal: Walkthrough of the protocol

## **Issues Discussion** Pasi & Hannes (1 hour 40 min)

- Goal: Go through the open issues
- Discuss & attempt to come to a consensus
- <http://www.vpnc.org/ietf-mobike> for issues

## **Design Draft Update** Hannes Tschofenig (15 min)

- Goal: Status report & next steps
- <http://www.ietf.org/internet-drafts/draft-ietf-mobike-design-03.txt>

## **Wrap-up and AOB** Chairs (20 min)

# Document Status

- **Draft-ietf-mobike-design-03.txt**
  - We resolved the main design issues in May
  - Now working on editing the document
  - And taking into account new issues as they come up
- **Draft-ietf-mobike-protocol-01.txt**
  - Constructed according to the main decisions in May
  - Initial document out in June
  - Reviewed
  - A revised version out in July and is being discussed
- **Related work**
  - draft-devarapalli-mip4-mobike-connectivity-00.txt
  - draft-dupont-mobike-transport-02.txt
  - draft-schilcher-mobike-pfkey-extension-01.txt
  - draft-schilcher-mobike-trigger-api-01.txt
  - draft-ietf-shim6-failure-detection-00.txt

## Way forwards

- Close all open issues on the protocol document
  - About two weeks for all simple issues
  - Then see what is still open
  - Probably: finish for real by September 15
- Then have WG last call
- At the same time as WG last call for the protocol: finish up on the design document
