

# Call Home BoF

IETF 63

# BoF Goals

- ① Hold informational/educational discussion
- ① Discuss where (if anywhere) such work should be done/considered

# Agenda

- 👁️ Agenda Bashing
- 👁️ Motivation / Description (Eliot)
- 👁️ Tunneling / HIP Approaches (Pekka)
- 👁️ Existing Work (ICE/STUN/...) (Jonathon)
- 👁️ (In)Applicability for ISMS (Dave H.)
- 👁️ Discussion / Close

# Presentations Here

- 👁 Discussion, next slide

# Discussion Points

- How broad is this issue? SNMP? Management? IETF? Not a problem at all
- Do we need a standard approach that is IETF-wide?
- Or.. should work be considered in individual WGs?
- How does this tie to choice of substrate (SSH/BEEP/TLS/...)?
