# tfrc-media – Updates

- Eliminated most of section 4.3 on interactive media
  - Response to Paris comments about negativity of section
  - Now mentions challenges for interactive media and need for future research
  - Keeps description of strategy 3, but limits applicability to constant rate codecs using large packets

# tfrc-media – Next Steps

- No comments on mailing list – ready for wg last call?
- Note -01 version belies maturity
  - Actually -05 for material, considering initial personal draft and Users Guide versions

# user-guide – Status

- No updates
  - -03 version expired a couple of days ago
- Removal of media apps material to tfrc-media leaves some content, but not much
- Given tfrc-media, need to rethink content for Users Guide
- Recommend: hold until more implementation experience
