

Report on TAHI DNS conformance test tool (64thIETF@Vancouver)

---

Hi, I'm Nobumichi Ozoe from Yokogawa Electric Corporation and working for TAHI Project.  
I report on TAHI DNS conformance test tool.

#### Testing Report

---

Last October, at 6th ETSI IPv6 Plugtests, we have tested one DNS client using our conformance test tool.

We found some bugs in client implementation and test tool.

As far as we tested, we didn't find any issue about DNS basic specifications.

#### Test tool status

---

And then TAHI project has released DNS client test tool version 0.1 at the first of November. Currently our test tool covers 75% of client test specifications.

You can download it freely!! Please try it.

#### Schedule

---

We are planning to hold test event next January in Japan.

And we will prepare newer test tool at that time. After test event it will be released.

So please visit our web site and join us our test event.

#### Let's discuss

---

We have already prepared mailing list to discuss about test spec and tool.

Please subscribe.

Last, our URL is <http://www.tahi.org/>

See you next TAHI test event.
