

LDAP Revision Working Group

Chairs: RL “Bob” Morgan
 Kurt Zeilenga

IETF 64, Vancouver, Nov 2005

Should we hit “send”?

- The chairs, believing the WG has consensus that the remaining WG drafts should be approved and published as Standard Track RFCs, hereby recommend the IESG consider and approve these WG drafts as Proposed Standards, replacing the existing LDAP technical specification (RFC 3377).
- The chairs recommend that, upon IESG approval of the above drafts, conclude the LDAPBIS WG. The chairs recommends the LDAPBIS mailing list remain open for subsequent discussion of implementation reports necessary to achieve Draft Standard status.

Directory Directorate @ IETF#65

- The Directory Directorate will request a room for purposes of holding an open meeting to discuss on-going and future directory standards work. Discussion of this topic should take place on the ldapext@ietf.org list.

LDAPBIS Wake

- Yaletown Brewing Company
 - 1111 Mainland Street
 - 19:45 - ??
