MIB for the UDP-Lite protocol

draft-ietf-tsvwg-udplite-mib-00

RFC 3828 is RFC 768: with *partial checksums*

IPv4 & IPv6

This draft provides a MIB

Shares v4/v6 basics with UDP-MIB (RFC 4113)

MIB for the UDP-Lite protocol Rev-02; WG Rev-00

Rev -02 (April 2-07)

Removed redundant MIB-2 number (Bill Fenner)

All error counters now Counter32

InBadCoverage subsumed by InBadChecksum

Updated description of udpliteEndpointInstance

(from draft-persson-v6ops-mib-issue-01.txt)

Clarified that NoPorts does not increment InErrors

Only minor changes in last rev (WG -00)

We've done everything on our to-do list!
