Status

- Additional review by Rafa Marin Lopez
- Submitted -01 in February
- Ready for WGLC

Technical changes from -01

- Added reference to EAP performance and 802.11r
- Removed L2 from MN-CA (Mobile Node to Candidate Authenticator) signaling to be consistent of the scope of the document
- Not precluding normal authentication to be performed at L3
- Correction on the objective for not recommending network-initiated pre-authentication
 - The objective is to mitigate pre-authentication DoS attack to MN
