

RTCP HR

draft-ietf-avt-rtcphr-03.txt

Alan Clark, Geoff Hunt

Future of RTCP HR draft

- HR use of sub-blocks limits flexibility and re-use
- Proposed solution is to:
 - (a) split HR into individual XR blocks, each in a separate draft
 - (b) review each block to ensure that it is re-usable across applications
- New drafts are already under construction and at least some will be submitted this week
