12 November 2009 / MANET WG, IETF-Hiroshima

Updates and Work Items

Updates:

- DYMO-MIB [1] – Added DEFVAL clauses to all read-write configuration objects with defaults identified
- SMF-MIB [2] – Updated the textual material; sections on IMPORTS, relationship to other MIBs, etc.

Work Items:

- DYMO-MIB – Is near complete; need to work the security section.
- SMF-MIB – Is pretty well fleshed out; need to work security section and NOTIFICATIONS.
