

LDP Extensions for MPLS-TP PW Proactive OAM Configuration

[draft-zhang-mpls-tp-pw-oam-config-04](#)

PWE3/MPLS WG, IETF 80th, Prague

Fei Zhang

(zhang.fei3@zte.com.cn)

Bo Wu

(wu.bo@zte.com.cn)

Elisa Bellagamba

(elisa.bellagamba@ericsson.com)

Changes from last meeting

- Move the MPLS-TP PW OAM capability negotiation into the Initialization message

0	1	2	3
0 1 2 3 4 5 6 7 8 9 0	1 2 3 4 5 6 7 8 9 0	1 2 3 4 5 6 7 8 9 0	1 2 3 4 5 6 7 8 9 0 1
<pre>+---+ 1 0 Type (TBD) Length (= 4) </pre>			
<pre>+---+ 1 Reserved Reserved V F D L </pre>			
MPLS-TP PW OAM Capability TLV			

- ✓ "L" : Loss Measurement supported
 - ✓ "D" : Delay Measurement supported
 - ✓ "F": Fault Management Signal supported
 - ✓ "V": Connectivity Verification supported

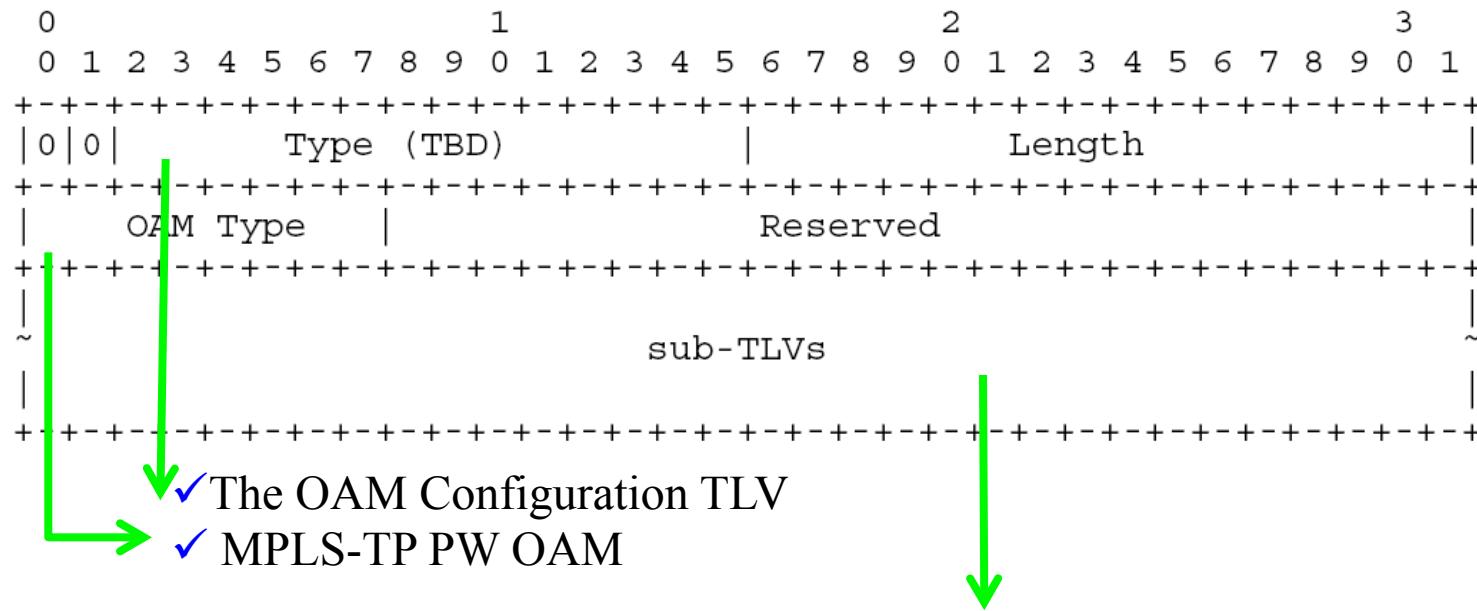

- MPLS-TP PW OAM Administration TLV is used to configure MEP/MIP functions and enable/disable OAM alarms

0	1	2	3
0 1 2 3 4 5 6 7 8 9 0	1 2 3 4 5 6 7 8 9 0	1 2 3 4 5 6 7 8 9 0	1 2 3 4 5 6 7 8 9 0 1
<pre>+---+</pre>			
0 0	Type (TBD)	Length	
<pre>+---+</pre>			
E I A	Reserved		
<pre>+---+</pre>			

MPLS-TP PW OAM Administration TLV

- The other revised parts are editorial in nature (Thanks Eric Gray for his review)

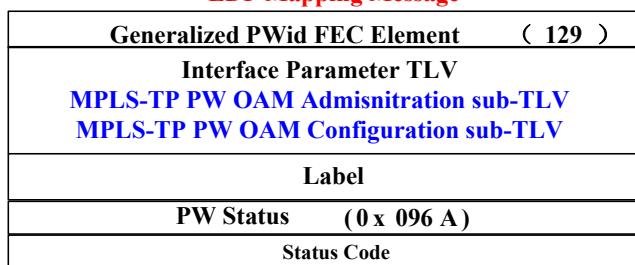

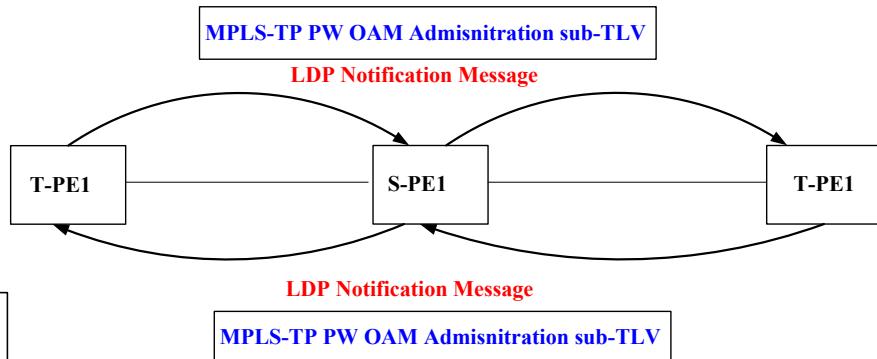

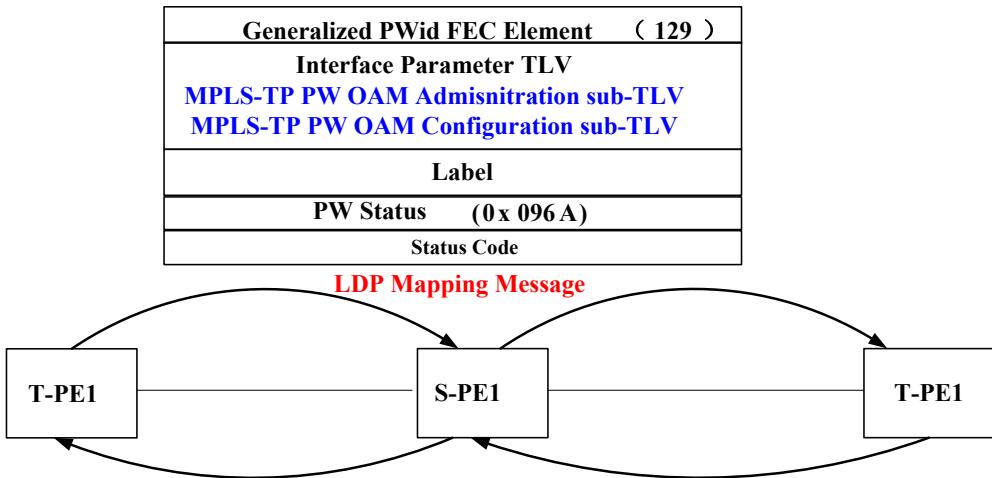

The Structure of MPLS-TP PW Proactive OAM Configuration TLV

- MPLS-TP PW OAM Function Flags sub-TLV
 - ✓ CC/CV/PM Loss/PM Delay/FMS
- BFD Configuration sub-TLV
 - ✓ Local Discriminator sub-TLV
 - ✓ Negotiation Timer Parameters sub-TLV
 - ✓ BFD Authentication sub-TLV
- MPLS-TP PW PM Loss sub-TLV
- MPLS-TP PW PM Delay sub-TLV
- MPLS-TP PW FMS sub-TLV;

MPLS-TP PW Proactive OAM Configuration Procedure

- Step 1: the MPLS-TP PW OAM capability negotiation in the Initialization message
- Step2: Configure the OAM parameters
- Step 3: Enable OAM alarms

- The procedures of adjusting OAM Parameters and Deleting OAM Entities are also described in the document

Next Steps

- Comments/Feedback?
- Keep in parallel with the related work done in MPLS-TP
 - [draft-ietf-ccamp-rsvp-te-mpls-tp-oam-ext](#)
 - [draft-ietf-mpls-lsp-ping-mpls-tp-oam-conf](#)

Adopted as a WG document?
