

# Gateway Initiated Dual-Stack lite

(draft-ietf-softwire-gateway-init-ds-lite-03)

## Status Update

Authors:

Frank Brockners (fbrockne@cisco.com),  
Sri Gundavelli (sgundave@cisco.com),  
Sebastian Speicher (sebastian.speicher@telekom.de),  
David Ward (dward@juniper.net)

# Status & Next Steps

- Adopted as Softwire WG draft in May/2010
- 3 detailed document reviews  
(thanks to Olaf Bonness, Yiu Lee, Tina Tsou)
- Changes from -02 to -03
  - Detailed IP-in-IP encap (IPv4-in-IPv4, IPv4-in-IPv6, IPv4-in-IPv6 w/ Flow-Label)
  - Moved Section 7 (“GI-DS-lite Deployment”) to Annex A
  - Cleanup of several editorial nits and minor wording changes
- Discussion (current discussion on list)
  - MPLS encapsulation currently only for MPLS VPNs;  
Complement with “plain” IP-over-MPLS?
- Next steps
  - Close on MPLS encapsulation discussion and evolve to WGLC?
