

WSON Optical Interface Class

`draft-martinelli-wson-interface-class-00`

Giovanni Martinelli Cisco

Gabriele Galimberti Cisco

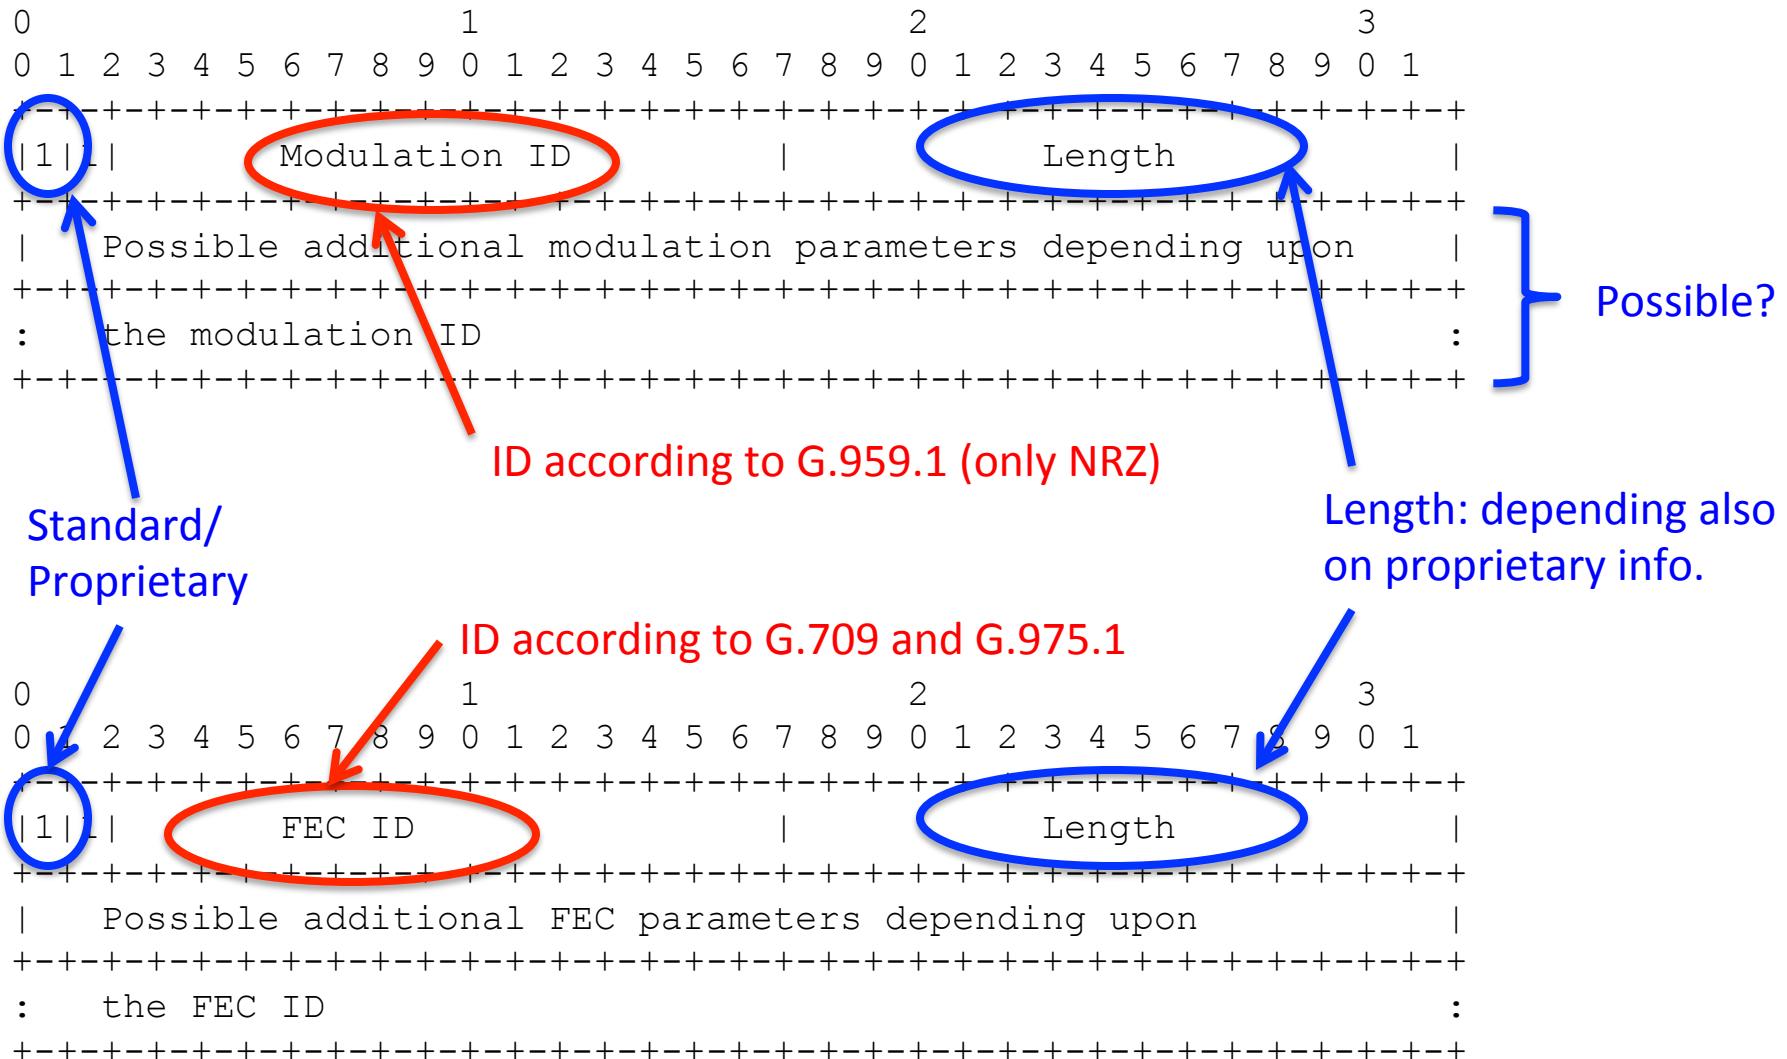

Overview

- **What:** Propose a different way to solve the WSON signal compatibility.
- **Why:** (to some extent) keep protocol extensions independent from ITU standard evolution.
- **Draft Status:** a rough cut proposed here to start discussion.

Current WSON status

- Signal compatibility parameters (RFC6163):
 - FEC (forward error correction)
 - Modulation Format
 - Bit Rate
- Definitions/Encodings:
 - draft-ietf-ccamp-rwa-info-11, draft-ietf-ccamp-rwa-wson-encode-11
- Protocol Extensions
 - OSPF: draft-ietf-ccamp-wson-signal-compatibility-ospf-04
 - RSVP: draft-ietf-ccamp-wson-signaling-01
 - PCEP: draft-lee-pce-wson-rwa-ext-02

Example: Mod Format & FEC

Problem

- There are already new modulation formats available for 40/100G (e.g. DPSK/QPSK):
 - standard will evolve soon (but we don't know how).
- What if we need some more parameters?
 - E.g. The Optical Impairment awareness case.

The Optical Interface Class

- It is a number
- Protocol operations become trivial: if two interfaces have the same number, they are compatible.
- The optical parameters values associated to this numbers are defined elsewhere.
 - So when optical std evolve no changes are required.

Optical Interface Class: encoding

0	1	2	3
0 1 2 3 4 5 6 7 8 9	0 1 2 3 4 5 6 7 8 9	0 1 2 3 4 5 6 7 8 9	0 1
----- ----- ----- -----	----- ----- ----- -----	----- ----- ----- -----	----- ----- ----- -----
Optical Interface Class			
----- ----- ----- -----	----- ----- ----- -----	----- ----- ----- -----	----- ----- ----- -----

Reference to:

```
Class value = 1  
{  
  FEC = ...  
  Mod Format = ...  
  Bit Rate = ...  
  ...  
}
```

```
Class value = 2  
{  
  FEC = ...  
  Mod Format = ...  
  Bit Rate = ...  
  ...  
}
```

**Class Values / Content
shall be defined
elsewhere.**

Conclusions

- Comments?
- From 00 to 01:
 - Details encoding
 - Refine how to associate Optical Interface Class with the set of optical parameters.
