
An extension to RELOAD to support
Direct Response Routing (& Relay Peer
Routing)

draft-zong-p2psip-drr-00 (&
draft-zong-p2psip-rpr-00)

Roni Even
Yunfei Zhang

Status

- It was agreed in last IETF meeting (IETF 80th) that two drafts are preferred to address Direct Response Routing (DRR) and Relay Peer Routing (RPR) separately.
 - Two milestones for P2PSIP Direct Response and P2PSIP Relay Response were then created.
 - Two individual drafts were submitted to meet these two milestones
 - draft-zong-p2psip-drr-00 for P2PSIP Direct Response
 - draft-zong-p2psip-rpr-00 for P2PSIP Relay Response
 - These two drafts are just separation of previous draft-jiang-p2psip-relay-05, no additional technical content are further added.
-

Next Step

- Call for adoption of draft-zong-p2psip-drr-00 as WG document for P2PSIP Direct Response?
 - Call for adoption of draft-zong-p2psip-rpr-00 as WG document for P2PSIP Relay Response?
-

Thank you
