

# Gateway Initiated Dual-Stack lite

(draft-ietf-softwire-gateway-init-ds-lite-05)

## Status Update

Authors:

Frank Brockners (fbrockne@cisco.com),  
Sri Gundavelli (sgundave@cisco.com),  
Sebastian Speicher (sebastian.speicher@telekom.de),  
David Ward (dward@juniper.net)

# Status

- Changes since IETF 80 (changes from -03 to -05)
  - clarified the use of MPLS VPN encapsulation (aligned with 3GPP 23.975)
  - added plain IPv4/IPv6-in-MPLS
  - allow for the software between Gateway and AFTR to be established at any point in time (not just at startup)
- Status
  - Document is in WG LC (finishes August 1<sup>st</sup>, 9am EDT)
