RSVP-TE Extensions for Configuration SRLG of an FA

draft-zhang-ccamp-srlg-fa-configuration-04.txt

Fatai Zhang (Huawei)
Dan Li (Huawei)
Oscar Gonzalez de Dios (Telefonica)
Cyril Margaria (NSN)

Updates from -03 version

- **Removed explanation of how to update SRLG information**
  - Agreement in 81st IETF meeting to focus the draft on defining the SRLG collection procedure
  - Update producedure is standard RSVP-TE procedure
  - Replaced explanation by reference to Section 4.4.3 of [RFC 3209]
- **Small rewording of sections 2.3, 3.1, 5.1**
  - Compliance with RFC2119 wording

OPEN issues

- Handling of LSP_ATTRIBUTES :
  - The collection can be made optional or mandatory
  - SRLG collection upon client layer requirement , for example no SRLG collection when no diversity needed/ best effort/low priority traffic
  - It allows easier migration

Next Steps

- Adopt to be a WG document?
- Refine the text
